Important:

• Tighten legs securely

NOTE: KING SIZE bases require use of at least two leg segments. Failure to use a minimum of two leg segments could result in damage to base and floor and will void your product’s warranty.

If you have a split deck base, begin with Split Deck Assembly.

1. If you have a split deck base, begin with Split Deck Assembly.
2. Turn base over and insert E into A.
3. Press and hold the Sync button (round button on the side of the bed) for 5 seconds. The underbed light will start blinking indicating the bed is ready to be synced to the remote. Release the button.
4. Simultaneously press and hold the Head Up and Foot Up buttons on the remote control. When the LED light around the Sync button turns off, release the buttons.
5. Test the bed and repeat the steps if it is not working.

Emergency Stop: Press the Sync button on the side of the base; the LED light around the button will turn red and the bed will stop.

Download Our Apps

Download our apps in the Apple or Google Play store. Open the app & follow the instructions. You will then be able to control your Base from most Apple or Android devices!
